Professional Summary

Java Engineer with 4 years of experience building event-driven backend services on the JVM.

Skills

Java, Spring Boot, Kafka, PostgreSQL, Microservices, Docker, AWS, Kubernetes

Experience

Java Engineer | Summit Freight | 2023 - Present

- Led the upgrade from Java 11 to Java 21 across 30 services.
- Optimized PostgreSQL schemas for high-write workloads.
- Introduced Kafka event streams to decouple order and inventory services.

Java Engineer | Meadowlark Media | 2022 - 2023

- Added distributed tracing to diagnose cross-service latency.
- Reviewed code and mentored three junior engineers.

Education

BSc Software Engineering, Eastfield College (2021)
