Professional Summary

Lead Data Scientist with 11 years of experience building predictive models and turning experiments into product decisions.

Skills

Python, SQL, Machine Learning, TensorFlow, AWS, Spark, Pandas

Experience

Lead Data Scientist | Pinecrest Software | 2022 - Present

- Mentored two junior analysts on experiment design and model validation.
- Trained TensorFlow demand models and deployed batch scoring jobs on AWS.
- Created feature pipelines in SQL and Python that cut model refresh time from days to hours.

Data Scientist | Meadowlark Media | 2018 - 2022

- Designed A/B test analyses for pricing changes and presented results to product leadership.
- Replaced spreadsheet forecasts with gradient-boosted models, reducing error by 12%.

Associate Data Scientist | Silverline Bank | 2015 - 2018

- Built a churn-prediction model that let retention teams target the top 5% of at-risk accounts.

Education

MSc Data Science, Cedar Valley University (2015)
