Professional Summary

Senior Java Engineer with 8 years of experience building event-driven backend services on the JVM.

Skills

Java, Spring Boot, Kafka, PostgreSQL, Microservices, AWS, REST APIs

Experience

Senior Java Engineer | Pinecrest Software | 2025 - Present
- Modernized order-processing services with event-driven architecture.
- Built Spring Boot microservices processing 5 million orders a month.
- Optimized PostgreSQL schemas for high-write workloads.

Java Engineer | Ironwood Insurance | 2024 - 2025
- Reviewed code and mentored three junior engineers.
- Introduced Kafka event streams to decouple order and inventory services.

Associate Java Engineer | Lattice Learning | 2018 - 2024
- Added distributed tracing to diagnose cross-service latency.
- Led the upgrade from Java 11 to Java 21 across 30 services.

Education

BSc Software Engineering, Lakeside Institute of Technology (2016)
